PROFESSIONAL SUMMARY

Salesforce Developer with 3.5 years of experience delivering end-to-end Salesforce solutions across multiple projects. Strong expertise in Apex, Lightning Web Components (LWC), Triggers, Flows, asynchronous processing, Salesforce integrations, and Administration. Proven ability to contribute across the full project lifecycle, from requirements analysis and solution design to development, deployment, and post-production support. Experienced in Copado deployments and collaborating with cross-functional teams to deliver scalable, high-quality solutions.

WORK EXPERIENCE

Accellor Software Pvt. Ltd.

Salesforce Developer — Sept 2022 - Present

Integrations (AWS to ISVC, REST APIs- Reltio to ISVC, IRC to ISVC).

- Designed and implemented REST resource classes to process inbound payloads, create records, attach payloads as files, and perform data operations on related Salesforce objects.
- Applied retry logic to automatically reprocess failed records up to three times per day, ensuring reliable integration processing.
- Developed HTTP callouts using Apex to integrate with the SendGrid API for automated email notifications.
- Configured Service cloud voice (SCV), Connected Apps, Named Credentials, and Auth Providers to enable secure an scalable external system integrations.

Lightning Web Components (LWC)

- Developed a responsive inbound handler LWC enabling DataOps teams to identify survivor and non-survivor records during data processing.
- Built interactive LWC dashboards for project, team, and resource tracking, visualizing allocation, availability, and roles using doughnut and bar charts.
- Integrated third-party libraries via static resources to enable exporting filtered data to Excel.

Apex, Trigger & Asynchronous Processing

- Implemented Batch Apex and Schedulable classes to process pending records and manage retry mechanisms.
- Optimized SOQL queries and handled governor limit and CPU time exceptions using asynchronous processing (Future methods).
- Developed Apex triggers to capture and store old record values and update records based on approval outcomes.

Configuration & Security

- Designed and enforced Salesforce security and access controls, including Profiles, Permission Sets, Permission Set Groups, and Sharing Rules, to meet business and compliance requirements.
- Configured role hierarchy, OWD, and record-level sharing to ensure appropriate data visibility across users and teams.

Copado Deployments

- Worked as a Copado Deployment Engineer for 6 months, managing end-to-end deployments across multiple environments.
- Performed metadata backfilling, configuration validation, and pre-/post-deployment activities.
- Collaborated with development and QA teams to ensure smooth and error-free releases.

PROJECTS

Accelerate — Nov 2022 - April 2023

- Developed a scalable Salesforce solution to streamline resource management, project tracking, and team collaboration.
- Automated routine tasks using Apex triggers and batch classes.
- Integrated the SendGrid API to enable automated email notifications.
- Delivered dynamic Lightning Web Components dashboards that provide stakeholders with real-time insights into resource allocation, project progress, and team availability.
- Exportable Excel reports were created to facilitate easy data analysis and support informed decision-making by management.

Intel Taurus PFS (IRC to ISVC) May 2023 - March 2024

- Integrated the IRC system with the ISVC system to automate the creation of records for premium-supported products.
- Developed REST resources and leveraging Platform Events in ISVC to enable seamless communication and data synchronization between the two systems.
- Built a Connected App to securely manage authentication and API interactions.

Intel Scorpio (Reltio to ISVC) April 2024 - Present

- Integrated Salesforce with Reltio to enable seamless inbound data transfer, perform record operations, and provide real-time visibility of integrated data within Salesforce.
- Developed and implemented secure REST resource classes and configured a Connected App to facilitate authenticated API communication between the two systems.
- Built dynamic Lightning Web Components to display inbound records, allowing the DataOps team to evaluate and determine survivor status for data consolidation.
- Implemented Batch Apex classes to process and merge large volumes of account data based on decisions from external teams, ensuring data integrity.
- Served as a Copado Deployment Engineer, managing metadata deployments across multiple environments and coordinating with team members to ensure smooth and consistent releases.

SKILLS

Apex, Triggers, Asynchronous Apex, Integration, Rest, Soap, Postman, Administration, Configuration, Sales Cloud, Service Cloud, Copado, Salesforce Flows, LWC, Aura, Visualforce, Html, CSS, JS.

EDUCATION

Gaya College Gaya

Bachelor Of Information Technology - 78% June 2018 - April 2022

CERTIFICATE

Salesforce Certified Platform Developer I (PD-1)

Salesforce Certified Associate

Salesforce Certified AI Associate

Salesforce Certified Data Cloud Consultant

Salesforce Certified Agentforce Specialist
