PROFESSIONAL SUMMARY

Salesforce Developer with 4.1 years of experience delivering end-to-end Salesforce solutions across multiple projects. Strong expertise in Apex, Lightning Web Components (LWC), Triggers, Flows, asynchronous processing, Salesforce integrations, and Administration. Proven ability to contribute across the full project lifecycle, from requirements analysis and solution design to development, deployment, and post-production support. Experienced in Copado deployments and collaborating with cross-functional teams to deliver scalable, high-quality solutions.

WORK EXPERIENCE

Accellor Software pvt, ltd

Salesforce developer sept 2022 - Jun 2026

Integrations (AWS to ISVC, REST APIs- Reltio to ISVC, IRC to ISVC).

- Designed and implemented REST resource classes to process inbound payloads, create records, attach payloads as files, and perform data operations on related Salesforce objects.
- Applied retry logic to automatically reprocess failed records up to three times per day, ensuring reliable integration processing.
- Developed HTTP callouts using Apex to integrate with the SendGrid API for automated email notifications.
- Configured Service cloud voice (SCV), Connected Apps, Named Credentials, and Auth Providers to enable secure an scalable external system integrations.

Lightning Web Components (LWC)

- Developed a responsive inbound handler LWC enabling DataOps teams to identify survivor and non-survivor records during data processing.
- Built interactive LWC dashboards for project, team, and resource tracking, visualizing allocation, availability, and roles using doughnut and bar charts.
- Integrated third-party libraries via static resources to enable exporting filtered data to Excel.

Apex, Trigger & Asynchronous Processing

- Implemented Batch Apex and Schedulable classes to process pending records and manage retry mechanisms.
- Optimized SOQL queries and handled governor limit and CPU time exceptions using asynchronous processing (Future methods).
- Developed Apex triggers to capture and store old record values and update records based on approval outcomes.

Configuration & Security

- Designed and enforced Salesforce security and access controls, including Profiles, Permission Sets, Permission Set Groups, and Sharing Rules, to meet business and compliance requirements.
- Configured role hierarchy, OWD, and record-level sharing to ensure appropriate data visibility across users and teams.

Copado Deployments

- Worked as a Copado Deployment Engineer for 6 months, managing end-to-end deployments across multiple environments.
- Performed metadata backfilling, configuration validation, and pre-/post-deployment activities.
- Collaborated with development and QA teams to ensure smooth and error-free releases.

Ideeo Software Solution pvt, ltd

Salesforce developer July 2026 - Present

Integration (Salesforce to Docfusion, SigningHub)

- Integrated Docfusion with Salesforce to automate dynamic document generation and contract workflows, reducing manual drafting time and streamlining document delivery processes.
- Implemented secure Rest APIs to enable seamless data exchange between Salesforce to signingHub.

Lightning Web Components (LWC)

- Built and enhanced custom **Lightning Web Components (LWC)** to deliver responsive, user-centric interfaces and improve application performance.
- Identified, debugged, and resolved critical UI defects across custom Salesforce pages.
- Partnered with cross-functional teams to perform root-cause analysis on technical issues.

PROJECTS

Accelerate Nov 2022 - April 2023

- Developed a scalable Salesforce solution to streamline resource management, project tracking, and team collaboration.
- Automated routine tasks using Apex triggers and batch classes.
- Integrated the SendGrid API to enable automated email notifications.
- Delivered dynamic Lightning Web Components dashboards that provide stakeholders with real-time insights into resource allocation, project progress, and team availability.
- Exportable Excel reports were created to facilitate easy data analysis and support informed decision-making by management.

Intel Scorpio CIM (Reltio to ISVC) May 2023 - June 2025

- Integrated Salesforce with Reltio to enable seamless inbound data transfer, perform record operations, and provide real-time visibility of integrated data within Salesforce.
- Developed and implemented secure REST resource classes and configured a Connected App to facilitate authenticated API communication between the two systems.
- Built dynamic Lightning Web Components to display inbound records, allowing the DataOps team to evaluate and determine survivor status for data consolidation.
- Implemented Batch Apex classes to process and merge large volumes of account data based on decisions from external teams, ensuring data integrity.
- Served as a Copado Deployment Engineer, managing metadata deployments across multiple environments and coordinating with team members to ensure smooth and consistent releases

Intel Hercules (AWS to ISVC) May 2025 - Jun 2026

- Integrated **Service Cloud Voice (SCV)** with **Amazon Connect**, building end-to-end automation to enable seamless inbound call handling, real-time case creation, and automatic contact record linking during live calls.
- Implemented custom Apex Rest Inbound web services in Salesforce to process Amazon Connect payloads in real time, querying case records and returning live status updates directly to callers over the phone via IVR.
- Configured and managed External Client Apps (ECA), connected apps, and OAuth authentication flows to securely authenticate API calls between Amazon Connect/AWS Lambda and Salesforce.
- Developed custom business logic for phone-based case creation, mapping caller attributes to Salesforce case fields to minimize manual agent data entry and reduce average handling time (AHT).
- Handled full lifecycle delivery of the telephony-CRM integration including contact flow design, Lambda-to-Apex payload mapping, system security, and troubleshooting API endpoints.

BCB Botswana onboarding July -2026 - Present

- Implemented custom Apex Rest callout fixes to resolve the signature failure and ensure reliable real-time communication between the portal and external services.
- Implemented automated file attachment logic that converts and links signed customer documents directly to Salesforce Application records upon e-signature completion.
- Resolved complex Lightning Web Component (LWC) UI defects, improving front-end responsiveness, form validation, and overall onboarding UX.

SKILLS

Apex, LWC, Triggers, Asynchronous Apex, Integration, Rest, Soap, Postman, Aura, Visualforce, Html, CSS, JS,- Administration, Configuration, Sales Cloud, Service Cloud, Health Cloud, Copado, Salesforce Flows, Service Cloud Voice (SCV).

EDUCATION

Gaya College Gaya

Bachelor Of Information Technology - 78% June 2018 - April 2022

CERTIFICATE

Salesforce Certified Platform Developer I (PD-1)

Salesforce Certified Associate

Salesforce Certified AI Associate

Salesforce Certified Data Cloud Consultant

Salesforce Certified Agentforce Specialist
